LIBOCON

Let's watch the video first.

How many "Easter eggs" can you find out in the animation?

Hint: Almost **every** object in this animation contains special meanings.

1. LibreOffice Viewer promo video for Google Play (as mentioned on this list): what we should include, how long it should be, other ideas

* Make a short video, a summary, that can be extended when new releases are made (keep the source) -- add "Help us to make it even better!" at the end with tdf.io/joinus

* Do an animation rather than show the app itself? eg LibreOffice logo on a desktop PC, then shrinks and jumps into a phone -- "The power of LibreOffice is now available in your pocket" -- talk to Franklin about his contact who does 3D animations with Blender and provide a concept (we should provide some kind of briefing)
